HSI TO SHOWCASE ITS REVOLUTIONARY PROFIT SERIES MOBILE POINT OF SALE FEATURING APPLE'S IPOD TOUCH AT THE NATIONAL RESTAURANT ASSOCIATION RESTAURANT, HOTEL-MOTEL SHOW (HSI BOOTH #4200)

Scottsdale, AZ—May 12, 2009—[Hospitality Solutions International](#) (HSI), a division of [MICROS Systems, Inc.](#), and a leading provider of information technology solutions for the hospitality industry today announced it will showcase its revolutionary handheld POS, Profit Series Mobile, with Apple's iPod touch® at the National Restaurant Association Restaurant, Hotel-Motel Show® at Chicago's McCormick Place May 16-19, 2009.

Profit Series Mobile POS, used exclusively with Apple's iPod touch®, is revolutionizing the way restaurateurs and hoteliers approach handheld and mobile point of sale. The flexibility of the iPod touch® enables it to be used for a variety of tasks including tableside ordering, manager functions such voids and discounts, and is a great fit as a mini-bar solution in properties with wireless throughout. Built-in Wi-Fi wireless connectivity on the iPod touch enables access to HSI's hosted applications such as MyHSI.net Enterprise Reporting Tool.

In addition to the flexibility of use with other HSI applications, the iPod touch is able to display Profit Series' full-size POS screens. Unlike other handheld POS applications, Profit Series Mobile uses the exact same screens as its traditional POS terminals – eliminating the need for additional training. Apple's multi-touch feature enables the user to enlarge any part of the screen using a thumb and index finger and then touch the selection just as you would on a traditional POS terminal. Additionally, through the use of the Accelerometer, each screen may be viewed in portrait or landscape and immediately adjusts to the proper aspect ratio.

The attractively priced Apple iPod touch®, coupled with HSI's Profit Series Mobile software, make it the most affordable handheld POS device in the market. According to Apple executives, HSI's Profit Series POS is currently the only point of sale available for use with the iPod touch®.

“We are excited to bring this revolutionary handheld solution to the market and offer NRA attendees the ability to see it for themselves, in action, in our booth,” stated Cyndi Shepley, General Manager and Vice President, HSI, “While HSI has always maintained its ease-of-use, the Profit Series Mobile POS is on Apple’s iPod touch is intuitive, capitalizing on Apple’s multi-touch feature.”

Visit HSI at Booth #4200 at the National Restaurant Association Restaurant, Hotel-Motel Show® at Chicago’s McCormick Place May 16-19, 2009.

The HSI [Profit Series Point-of-Sale](#) system is an easy-to-use, windows-based solution designed to fit into nearly any hospitality environment. With over 800 individual configuration options, the Profit Series POS can be tailored to meet the needs of any hospitality operation. From a single POS terminal to a complex enterprise with multiple locations, the simplicity of design is backed by extraordinary functionality and intuitive graphics making the use and operation of the Profit Series POS one of the easiest in the industry.
